My Favorite "Gems"

were written and printed just for fun, and just for friends.

I started to write a dozen of my favorite writing Gems, but on and on it went until six volumes, and 1,798 pages were filled. It became a different book when I decided to add photos. Since color is expensive to print, I had the computer remove the color. These photos, and many more, are available on my web site, in full color, each with a story.

And most are so much better in color.

The Gem Books were Printed September, 2008,
not really Published, but just for fun.

Questions, comments, criticisms are all appreciated. But don't brag if you find a duplicate photo, or even a duplicate Gem. At least some are on purpose.

If you see a page you would like to read again, fold the corner, or scribble with pen or pencil, that's the only way to find it.

*Also, the best Gem in the Book is
just a few pages past the last one you read,
so don't give up!!!*

Our Travel Concept and Pattern Includes

If we have no schedule, we aren't late.

If we don't care where we are, we aren't lost.

If we have no itinerary we're exactly where we ought to be.

If we can't see IT this trip, we'll see IT next time.

First I wrote three books about our travels. I liked the little stories, so wrote the Snippet books, filled with one-paragraph stories. As I read them, I liked the "kernel," the seed of those stories, so edited them to a couple of sentences, then placed each Gem on a page, and used different sized type fonts to fill the page. Some of them look like they could be framed as a plaque.

My Gems are short Snippets.
